Founded: 2017

Biography

Lisa Strohmman, J.D., PhD

Dr. Lisa Strohmman is a clinical psychologist, author, public speaker and the founder and director of Digital Citizen Academy. She established Digital Citizen Academy to proactively prevent and educate students, educators and parents on the issues resulting from technology use and misuse. Dr. Strohmman has spent more than a decade working with adolescents and families in her private practice and a career working with schools to address challenges with student mental health and well-being.

In addition, Dr. Strohmman was a Visiting Scholar for the FBI working on homicidal pedophilia when a Columbine occurred giving her the opportunity to be on the front lines of how technology impacts our youth. She has continued to work with law enforcement and the FBI on safety and cybercrimes involving adolescents, while also lending her knowledge and guidance to the National Center for Missing and Exploited Children.

Dr. Strohmman holds a Bachelor Degree in Psychology from the University of California, Davis, where she graduated Magna Cum Laude and later earned a PhD and J.D., completing a joint integrated program in Law and Psychology at Villanova and Drexel Universities with honors. She was an active member of the American Bar Association, a past Chair of the American Psychological Association's Committee on Legal Issues and a current member of Pinnacle Forum.

Dr. Strohmman is an international speaker at schools, parent organizations, and business and community groups where she addresses the challenges of raising responsible digital citizens. She is also regularly featured in the media as a technology wellness and behavioral expert. She is regularly interviewed by TV and radio news outlets and quoted in numerous print publications including Forbes Magazine, Fast Company, and Huffington Post.

Heilbrun, K., Philipson, J., O'Neill, M., Paninopolous, M., Strohmman, L., Bowman, Q. (1998).

Digital Citizen Academy Launches Online Home Program for Families

Facing Issues with Technology

PHOENIX, Ariz. - Feb., 2019 -- Digital Citizen Academy, which offers online curriculum about internet safety and education for students, parents and educators through its resources, tools and trainings, has launched a specialized Home Program to support the entire family throughout the year.

The newly launched Home Program helps families raise responsible digital citizens and arms parents with access to an expert that not only worked with the FBI as a visiting scholar but who has dedicated her career to this field by using both her legal and clinical degrees to create specific trainings for families to protect children from the dangers of technology.

Digital Citizen Academy's research-based education, prevention and diversion programs are professionally designed to inform, protect and support young children through a cognitive behavioral trauma informed approach to ensure optimal success. Programs are designed with age appropriate content and provide trackable and measurable data for school districts and organizations.

"We've seen such incredible results from schools across the state of Arizona, as well as throughout the United States, and after continued requests, we decided to offer this same level of care for families at home," says Founder of Digital Citizen Academy, Lisa Strohmman, JD, PhD.

The content available for subscribed members is updated weekly to ensure families can navigate the ongoing challenges and protect their children from the pitfalls and dangers of online activities. All content stresses the importance of creating and maintaining a positive digital reputation and footprint to ensure there is a valued respect of digital opportunities.

DCA Home Program / Advocacy Membership includes:

- Comprehensive video instruction on topics for families of children in grades K-8.
- Home Resource Guide which provides instructional tools and answers on how to address issues of cyberbullying, inappropriate posting, digital cheating and digital reputation.
- Technology use contracts for families.
- Access to premium blogs on related issues and research.
- Access to premium webinars and live streams featuring Dr. Lisa Strohmman and special guests.
- Access to digital monitoring applications and resources to protect your child online.
- Q & A forum with access to experts and dialogue with other parents.
- Digital version of Dr. Lisa's book, *Unplug: Raising Kids in a Technology Addicted World*.
- Membership Discounts to local seminars or live speaking engagements.

Scottsdale Clinical Psychologist Launches Digital Citizen Academy

First of its kind education prevention program for schools and organizations

SCOTTSDALE, Ariz. – May 2017 – Dr. Lisa Strohmman, clinical psychologist and co-author of *Unplug: Raising Kids in a Technology Addicted World*, has now launched Digital Citizen Academy. Dr. Strohmman created this new interactive platform for schools and organizations to deliver research-based education, prevention and diversion programs that are professionally designed to combat, protect and support children, teenagers, and adults impacted by issues resulting from technology use, misuse and overuse.

"In my private practice, working one-on-one with children and parents I started to see more serious issues surface and began hearing from school principals and administrators facing serious challenges with students," explains Dr. Strohmman. "I knew I needed to do something that would reach and help more kids and address the challenges educators and parents now face."

Digital Citizen Academy (DCA) will support schools, school districts and organizations with affordable program options. Under the direction of Dr. Strohmman, DCA is designed with grade specific lessons for kindergarten through 12th grade, that appropriately and effectively communicate and teach safe practices for digital citizenship, digital reputations and provide tools and lessons on cyberbullying, sexting and digital cheating.

Schools and organizations that sign-up with DCA will have access to the prevention modules for students, which will allow them to track pretest and post-test scores and monitor ongoing results. In addition, there are modules specifically geared for parents and educators that give more detailed information on current issues. A diversion program will also be available as a disciplinary resource for offenders. Pricing is based on number of students, schools in the district and length of subscription.

During the 2016-2017 school-year the program was in beta testing in the Cave Creek School District. The school has already seen a significant drop in behavior incidents related to technology.

Sonoran Trails Middle School Principal Bill Dolezal states, "While we navigate through the waters of the technological revolution, it is critical that we educate our students on the benefits and dangers physiologically, psychologically, legally and emotionally. I am grateful that we are able to work with Dr. Strohmman and be part of her mission of educating students, staff and parents in school communities to help keep students safe, happy and healthy."

"Working together we can empower our communities to develop emotionally and physically healthy digital citizens that will strive to engage in positive social interaction, both on and offline," adds Dr. Strohmman.
